

REEFER MANAGEMENT

Manage Refrigerated Freight

Avoid Losses with 24/7 Temperature Monitoring

Gain real-time visibility into your refrigerated fleet to ensure the quality of temperature-sensitive shipments. The OneView™ Platform enables fleets to remotely monitor, track, and control temperatures across refrigerated trucks, trailers, containers, and stationary assets.

Connect eligible OEM reefer units directly into OneView through API integration to create a centralized view of temperature performance and operational status.

Key Features

- GPS Asset Tracking
- Two Way Reefer Control
- Real-Time Temperature Monitoring
- Instant Alerts
- Mobile & In-Cab Visibility
- Remote Pre-Trip Inspections
- OEM Reefer Integration

Key Benefits

Protect Temperature-Sensitive Freight

Continuous monitoring helps maintain proper temperatures and shipment quality.

Improve Fleet Visibility

Track reefer temperature status and asset location in real time.

Prevent Cargo Loss and Spoilage

Receive alerts when temperature deviations or equipment issues occur.

Maximize Equipment Uptime

Detect performance issues early to prevent disruptions.
