

CNS – COMPLIANCE NAVIGATION SPECIALISTS | HOS
COMPLIANCE & CDL SERVICES | PEDIGREE RESELLER PARTNER

The ELD partner that picks up the phone.

CNS – Compliance Navigation Specialists is a compliance-first consultancy helping new and growing trucking operations navigate DOT requirements, HOS audits, and ELD compliance — and has built its technology stack around Pedigree Technologies because of one thing that can't be faked: real human support.

ABOUT CNS – COMPLIANCE NAVIGATION SPECIALISTS

Guiding fleets through every compliance challenge

CNS – Compliance Navigation Specialists specializes in Hours of Service auditing, driver log training, and full DOT compliance support for trucking companies across the industry. For many clients, CNS is the first call they make when starting a new trucking operation — handling licensing, DOT setup, and the ELD onboarding that comes with it.

Danialle Hickey, ELD/HOS Specialist at CNS – Compliance Navigation Specialists, works directly with fleets to audit driver logs, deliver compliance training, and recommend the right technology solutions for each organization's needs.

WHY PEDIGREE TECHNOLOGIES

Support that actually separates the competition

CNS has evaluated other ELD platforms, and the defining difference comes down to what happens when something goes wrong—and who's there to help.

Comprehensive Training Library

PDF guides, videos, interactive modules, live and pre-recorded sessions — Pedigree’s Help Menu serves every learning style in every organization.

Real Human Support

When clients call, they reach a real person — not a chatbot. Pedigree doesn’t offshore support, and that reliability is central to the partnership.

Effortless IFTA Reporting

Automated IFTA tracking and easy report generation keep fleets audit-ready without manual record-keeping headaches.

Safety Manager Alerts

Speed alerts and safety notifications give fleet managers the visibility they need to keep drivers compliant and on the road safely.

“With other companies, I’m in a chat window and I can usually tell it’s AI answering — not a person. With Pedigree, I call and I talk to someone. That’s what my clients need.”

— Danialle Hickey, **CNS — Compliance Navigation Specialists**

One of the clearest differentiators **CNS** points to is Pedigree’s training library — accessible directly from the Help Menu inside OneView. With PDF guides, videos, interactive modules, and both live and pre-recorded sessions, it covers the full range of learning styles found in real-world fleets. For **CNS** clients who are new to ELD compliance, this resource is genuinely valuable.

PRODUCTS & SOLUTIONS

The right tool for every fleet type

CNS primarily sells Pedigree’s ELD product to CDL-regulated fleets. For non-ELD companies, a combination of fleet tracking and integrated camera solutions delivers an all-in-one approach to visibility, IFTA reporting, and video—especially as insurance carriers increasingly require documentation.

The consultative approach starts with understanding each customer’s specific situation before recommending any product — ensuring compliance requirements and operational realities are both accounted for from day one.

THE IMPACT

Compliance confidence from day one

For **CNS**’s clients — many of whom are launching new trucking businesses — getting ELD compliance right from the start is critical. Pedigree’s combination of reliable hardware, easy IFTA reporting, safety alerts, and accessible support means **CNS** can confidently hand off clients knowing they have the tools and backup they need.

And with Pedigree’s new OneView platform update — praised for its cleaner design and more natural workflow — the day-to-day experience for both compliance partners and their clients keeps improving.

“Customer service and support is what separates Pedigree from the industry. They don’t offshore it. When you call, you get a person — and they help you solve the problem.”

— Danialle Hickey, **CNS – Compliance Navigation Specialists**
